

Fax on Demand Automatically Transmits Frequently Requested Documents

Visionlab offers an easy and automated solution to dispensing applications, rate updates, company brochures, price sheets, user guides, or any frequently requested document to anyone with a fax machine.

Free up your fax lines and your office staff with Fax on Demand. Now instead of spending time receiving and sending out numerous document requests, your office team can spend their time on more productive tasks.

How Fax on Demand Works

- User dials your fax on demand number (direct or toll free), follows voice prompts to select the correct documents for delivery, enters the fax number to receive the documents, and hangs up.
- Visionlab converts the selected document to faxable pages and immediately sends them to the entered fax number.

With Visionlab's Fax on Demand, we provide all the technology and infrastructure for you. This means you need no special hardware or software on your part. All you need to do is send in the documents for system storage and chose whether you want a menu-based or index-based system for delivery and we do the rest.

Of course you can easily add documents to the system at any time. We also offer access to real time online reporting, where you can receive detailed or summary reports on transaction volume and expenses.

An online administrative tool (coming soon) will provide a quick and simple way to add or delete stored documents as well as manage reporting.

Fax on Demand Service Highlights

- Provides high volume document delivery without the hassles associated with distribution
- Easy to implement — no hardware or software is necessary on your part to utilize Fax on Demand
- Simple document upload and management
- Real time reporting on requests and delivery information
- Virtually unlimited fax capacity accommodates as many documents as you need to store
- Automatically retries busy signals based on an algorithm
- Support center offers assistance for technical and sales support issues

FEATURES

Reliable delivery
Document storage
Real time reporting
Secure transmission

BENEFITS

- > Documents are transmitted immediately upon request
- > Virtually unlimited capacity for as many documents as needed
- > Summary and detail reports available by document, dates, and call logs
- > Import reporting data to most databases
